# Testimonials

"Our investment in UnderDeck Oasis paid off the day it was installed. We sit out there for hours relaxing or playing games with our neighbors. Weather no longer is an issue and it's pretty to look at from indoors. It really enhances the beauty and functionality of our lower level."

to a Wonderful Place*

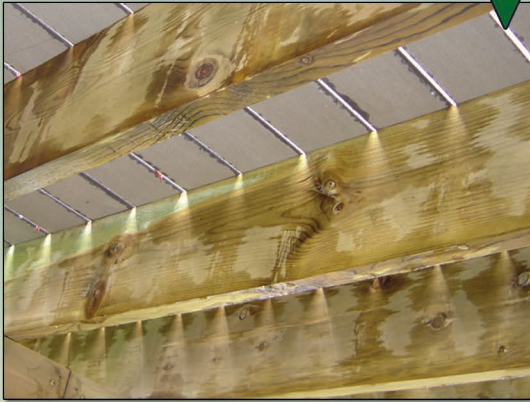

# How Does

## UNDERDECK Oasis

UNDER DECK DRAINAGE SYSTEM

# Work?

Imagine the Under Deck system as a giant trough that collects the rain water, keeping you dry and **hiding unsightly stains and mold.**

These specially designed ceiling panels and deep water brackets have been tested and approved to handle over **15" of water an hour.** You may have never thought of using the space below your deck as living space, but the truth is you can!

For more information, please visit [www.UnderDeckOasis.com](http://www.UnderDeckOasis.com)

UnderDeck Oasis acts like a pan **draining water** into a gutter system, protecting you and your furniture, spa, or grill from the elements.

The panels are slightly slanted to one side to allow the **water to move freely** into a gutter system.

The Deck Remedy system is the only system **made out of Aluminum** panels (most knock-offs are made of Vinyl).

The patented panels interlock to form a **seamless and water tight** system that collects rain water.

A gutter then redistributes the **water away from the deck and house.**
